**DIESEL FILTRATION
SOLUTIONS FOR SMALL
AND LARGER DIESEL
FUEL ENGINES**

DIESEL UNITS

FSLCOD TOPLOADED

Delivers clean and dry diesel. Often used to replace traditional separators.

Area of use: Larger diesel systems. As transfer system between Settling and Daytank

Filterhousing: Cast steel.

Material element: Special coalescer and separator/polisher element.

Running temperature: Buna /Viton -40°C til 107°C /-26°C til 135°C/.

Max working pressure: 10 Bar.

Max flow: Up to 2300 Ltr/min. For larger flows, please contact us

Extra equipment:

Frequency driven flow, Auto Air bleed, Løfteøyer
Total vannmengde giver, PM-1 partikkelmåler,

EXAMPLE OF USE

- Large live fish carrier.
- Between Settling tanks and daily usage tank.
- Automatic drain, Diff indicator and alarms
- LF 36" prefilter and 18" Coalescer system.
- 27 Liter/min

EXAMPLE OF USE

- Offshore PSV vessel.
- Between Settling tanks and daily usage tanks.
- Also with ability to filtrate larger storage tanks
- Automatic drain, **Washable prefilter**, LF 36" prefilter and 36" coalescer housing.
- With alarms and diff indicators on all housings.
- 17 Lliter/min
